

Monologue

by Abha M. Banerjee

A 45-minute CONVERSATION with Self, with confusions and doubts ...leading into a space of transcendence called ORGANIC UNITY! The conversation flows through the same cycle of potential, action, results and belief. However, the second half embraces this cycle consciously by OWNING new mental thoughts. Will these thoughts lead to personal mastery? A leader must equip his/her people with this power to transcend into personal leadership. A TRANSFORMATORY LEADER's capacity to carry the people from the middle ground to this uplifted ground – from a place of *inner subjective confusion* to a state of *personal clarity* – defines success as a leader!
